

## **CADDY CARGO BARRIERS – FIT GUIDE**

*Reference Catalogue Pages 43 – 47*

*All pricing includes GST. Excludes freight and fitting.*

*This document was last updated: 07/04/2015*

### **BARRIER LEAD TIMES**

**MTO (Made To Order)** Cargo barriers take 7 - 10 working days to manufacture.

**MADE TO ORDER CARGO BARRIERS ARE NOT RETURNABLE.**

**LVS (Low Volume Sellers)** There is a chance these cargo barriers are in stock.

If they are not in stock, they will take 2 - 4 working days to manufacture.

**LOW VOLUME SELLING CARGO BARRIERS ARE NOT RETURNABLE.**

**ALL BARRIERS REQUIRING CREDITS MUST BE RETURNED WITHIN 14 DAYS.**

### **FURTHER INFORMATION**

Points to consider to minimise the chances of ordering an incorrect barrier and to assist in easier installation of the barrier.

**ALWAYS REFER TO THE FOLLOWING COMMENTS LIST BEFORE ORDERING.**

- Does the vehicle have any additional flooring or lining?
- How many sliding doors does the vehicle have?
- If the barrier is a mid-position, is it over or in front of the wheel arches?
- Any vehicles with a sunroof fitted; call Ausguard to check that this will not affect the installation of the barrier.
- Are there any additional seats running down the side of the vehicle?
- Are there any air conditioning ducts, spare tyres, stereo systems, speakers etc. that may interfere with the installation of the cargo barrier?
- Does the vehicle have side curtain airbags?

**NOTE:** Vapour deterrent cargo barriers are unlikely to totally seal your cargo area - your barrier should be checked regularly as some chemicals can react with the sealant. Sealant may be applied to roof lining and existing flooring but not always applied direct to the metal.
